Purpose:

The purpose of this project is to create a virtual robot which answers any question related to IIIT Naya Raipur without the intervention of man-kind.

Aim:

The aim of the project is described below:

- *To create a conversational agent which can respond to queries related to IIIT Naya Raipur.*
- *To use the techniques of Natural Language Processing to identify the keywords and match them in the defined database.*
- *To use the defined libraries to perform Text to Speech and vice-versa processing.*
- *To make the robot understand the usage of multiple Keywords.*
- *To use the defined libraries to perform the identification of the required web pages.*
- *To design a web-based user interface.*
